<b>I</b>	<b>Data Characteristics</b>	
<b>I.1</b>	<b>Description of the data</b>	<p>The data in this project will be created in collaboration with: Moritz Leidinger - Contactperson - <a href="mailto:null@student.tuwien.ac.at">null@student.tuwien.ac.at</a> - ID: ()</p> <p>One dataset will be created. This dataset is titled "NULL" and described as follows: This experiment aims to apply two machine learning models to solve a classification task for two different datasets. Each dataset is evaluated with each of the machine learning models, using different parameter settings and preprocessing strategies to compare the respective results and analyze across datasets and/or machine learning models.</p> <p>The datasets resource type genre is "dataset" and it's language is specified as "en" . It was issued on NULL.</p> <p>Keywords for the dataset are: Breast Cancer, Arrhythmia</p> <p>The data will be created over the course of a single project: <u>Project "NULL":</u> NULL</p> <p>The project starts at NULL and is due to end at NULL. It will be funded by NULL (NULL), with the Grant ID NULL (NULL). The funding status is currently "NULL".</p>
