I	**Data Characteristics**	
I.1	**Description of the data**	This dataset is titled "UCI Arrhythmia Dataset" and described as follows: This experiment aims to apply two machine learning models to solve a classification task for two different datasets. Each dataset is evaluated with each of the machine learning models, using different parameter settings and preprocessing strategies to compare the respective results and analyze across datasets and/or machine learning models. The datasets resource type genre is "dataset" and it's language is specified as "en" . Keywords for the dataset are: Breast Cancer, Arrhythmia
II	**Documentation and Metadata**	
II.1	**Metadata standards**	
II.2	**Documentation of data**	
II.3	**Data quality control**	• We use a readme file to describe the data quality and provide the source code of the experiment.
III	**Data availability and storage**	
III.1	**Data sharing strategy**	ID-1: https://doi.org/10.5281/zenodo.202648713 (HTTP-ORCID) UCI Repository: A publicly available dataset about Arrhythmia. Access to the data is open. It is in text/csv format with a size of <10MiB bytes and can be accessed at https://archive.ics.uci.edu/ml/machine-learning-databases/arrhythmia/arrhythmia.data .
III.2	**Data storage strategy**	
IV	**Legal and ethical aspects**	
IV.1	**Legal aspects**	License: • https://opensource.org/licenses/MIT Valid from: 2019-04-22
IV.2	**Ethical aspects**	Personal data: unknown Preservation statement: Must be preserved to keep research & development between stakeholders intact. Sensitive data: unknown Ethical issues: unknown
